THE GARDEN CORNER

You've probably seen these many times before, a daffodil! It's one of the first flowers to bloom at the end of winter, announcing the beginning of spring and signifying the end of the cold, snowy days. Daffodils are hardy perennials that come back year after year, spreading and often naturalizing. They are a fall-planted bulb usually planted in October with blooms appearing in late winter or early spring. Daffodils grow easily in most regions of North America. Travel towards the gazebo and you'll see these blooming in the berms. Enjoy these beautiful harbingers of spring!

When we focus on so much of what is going on in our world, it is easy to become fearful, depressed, and anxious. We start to feel like things are worse now than they have ever been.

If you are a student of history, you realize that is not true. Consider the first half of the 20th century—Stalin in the Soviet Union was responsible for the death of about 20 million people, Hitler was responsible for the death of over 11 million people, and Mao in China was responsible for the death of 40-80 million people. But because of modern technology, we today are bombarded and saturated with news from all around the world and almost as soon as it is happening. Living in such a world, we need to have ways of keeping things in perspective.

God’s words to us in Psalm 46:10 are significant—“Be still and know that I am God...” It is through my faith in the God who is the Creator and Sustainer of the universe and of our world that I best find perspective. As I focus on Him and His words and promises, I can get a more balanced outlook. Let us all take some moments today to refocus on Him!
